Full Spanish Working Rights (NIE, NUSS, Padrón) | Native English | Fluent Spanish

Results-driven Operations & Data Analyst combining an MSc in Computer Science (Distinction) and an LLB in Law with four years of hands-on experience re-engineering operational processes, scaling workflows, and building data-driven decision frameworks. Proven track record diagnosing systemic bottlenecks, building automated pipelines and KPI dashboards, and coordinating cross-functional teams to boost operational efficiency and service levels. Adept at translating complex operational needs into streamlined, automated tools in fast-paced environments. Based in Madrid with immediate availability.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Operations & Process Optimisation:** Continuous Improvement, Workflow Re-engineering, Root Cause Analysis, Operational Scaling, Project Scoping & Requirements Gathering, Capacity & SLA Tracking.
- **Data Analytics & Visualisation:** Advanced Excel / Google Sheets (Dynamic Operational & Financial Modeling), Power BI, Relational Data Modeling, DAX, KPI Dashboard Design, SQL, Data Extraction & Hygiene.
- **Automation & Systems:** Python (Data Pipelines / ETL, Pandas), Robotic Process Automation (Power Automate Desktop), Enterprise ERP (Oracle EBS), Collaborative Tooling (SharePoint, Microsoft 365 Architecture).
- **Communication & Cross-Functional Delivery:** Cross-Departmental Liaison, Supplier & Stakeholder Coordination, Structured Problem-Solving, English (Native), Spanish (Bilingual / Fluent).

PROFESSIONAL EXPERIENCE

North Yorkshire Council, UK | Systems Development & Operations Analyst
Oct 2024 – May 2026

- **Process Optimisation & Automation:** Spearheaded end-to-end operational diagnostic projects, re-engineering a multi-hour manual data extraction and reporting process into an automated Python pipeline executed in under 60 seconds.
- **Large-Scale Backlog Clearance:** Architected and deployed an automated RPA workflow with algorithmic exception handling, successfully validating, reconciling, and processing a legacy operational backlog of ~22,000 records.
- **Operational Reporting & KPI Infrastructure:** Designed relational data models and interactive Power BI KPI dashboards to monitor capacity, throughput velocity, operational bottlenecks, and SLA compliance across multi-disciplinary service streams.
- **Cross-Functional Project Execution:** Acted as primary operational systems analyst, collaborating closely with business stakeholders, technical staff, and leadership to convert operational pain points into scalable tools and actionable performance metrics.

North Yorkshire Council, UK | IT Systems & Access Analyst
Nov 2023 – Oct 2024

- **Workflow Standardisation:** Designed and implemented structured collaborative knowledge environments across distributed business units, eliminating operational silos and standardising documentation frameworks.
- **Service Availability & Governance:** Managed identity governance lifecycles and compliance across enterprise Microsoft 365 environments, resolving cross-functional operational escalations to guarantee uninterrupted service delivery.
- **Process Health Checks:** Executed continuous service readiness and endpoint diagnostics to identify risks proactively before they impacted day-to-day operations.

North Yorkshire Council, UK | Financial Compliance & Operations Officer
Mar 2023 – Nov 2023

- **ERP Transaction Management:** Supervised complex transactional workflows and statutory accounts within an enterprise shared service framework using Oracle EBS, ensuring 100% adherence to tight operational deadlines.
- **Cross-Functional Issue Resolution:** Served as the lead cross-functional liaison between legal counsel, front-line case teams, and finance to investigate systemic data anomalies and resolve workflow bottlenecks.
- **Data Integrity & Reconciliation:** Conducted structured audits and data reconciliations, ensuring rigorous operational quality control across all active ledgers.

North Yorkshire Council, UK | Legal Operations & Governance Analyst
May 2022 – Mar 2023

- **Dynamic Operational Modeling:** Diagnosed recurring workflow inefficiencies and developed custom dynamic Excel calculation engines and a regional workload tracker that eliminated manual tracking errors.
- **ERP Auditing & Cost Recovery:** Audited transaction histories via Oracle EBS, identifying data discrepancies and directly recovering legacy operational overpayments.

EDUCATION

- MSc Computer Science (Graduated with Distinction) – University of Wolverhampton (2024 – 2025)
- LLB Law (Hons) (Grade 2:1) – Teesside University (2020 – 2023)
- Diploma in Business Studies – Darlington College (2018 – 2020)
